

Peso

Learn about money with Peso

Around the world there are many different names for "money". I'm proud to be named after what people living in Mexico use to pay for items, the peso. In the United States, it's the dollar. Across the ocean in Britain pound is used. In China, money is yuan and in Japan it is yen.

It's fun to look at the pictures used on coins and paper money from other countries.

If you could design your own coins or paper money, what would they look like?

Coin collecting

Each year, the United States produces billions of coins. That means there are quarters, dimes, nickels and pennies with the year you were born printed on them. What year were you born? Do you know what year each member of your family was born? Find coins with these years and create your own family coin collection.
