

# Settings - Security

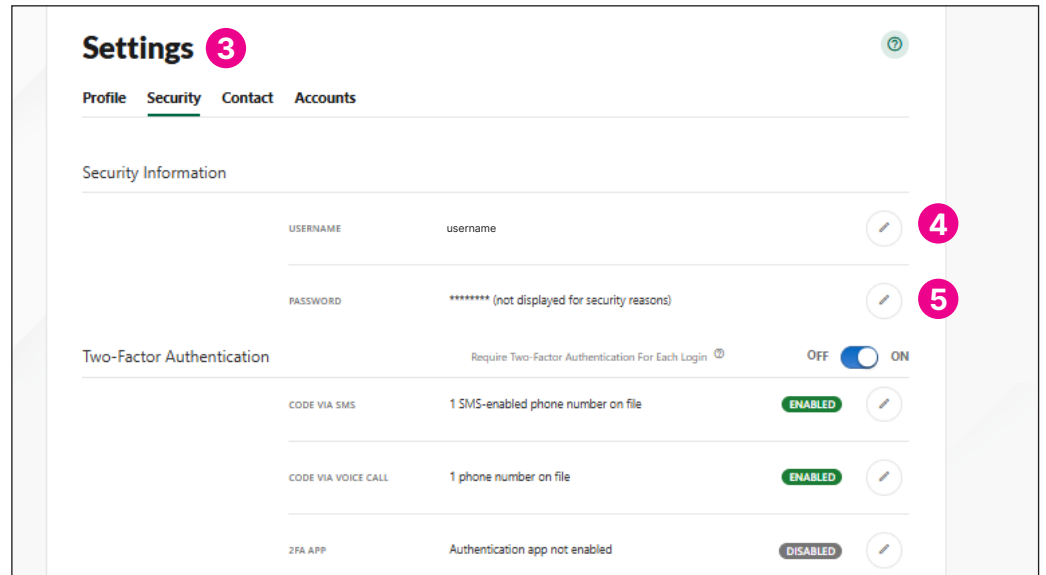

Turn on two-factor authentication or change your password in the Security settings.

- 1 Click your name.
- 2 Click **Settings**.
- 3 Select **Security**.

## Security Information

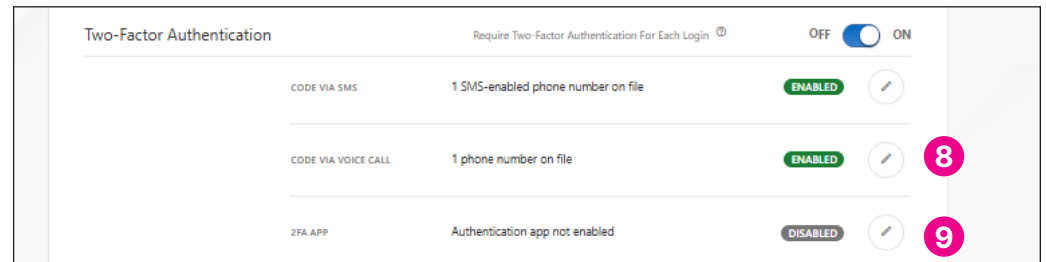

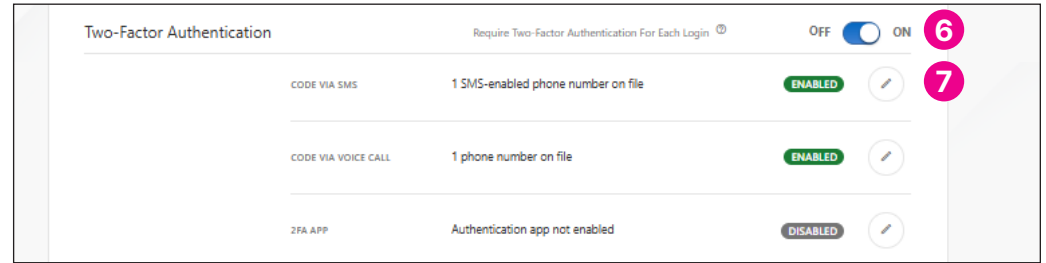

- 4 This shows your username. To change it, click on your username. Usernames must not already be in use, be between 8 and 15 characters and may use any combination of letters, numbers, periods and underscores. Click **Save Changes** to update or **Cancel** to cancel.
- 5 Your password is hidden for security purposes. To change it, click the pencil icon.
  - A Type your current password here.
  - B Type your new password here.
  - C Type your new password again here to confirm it.Click **Save Changes** to update or **Cancel** to cancel.

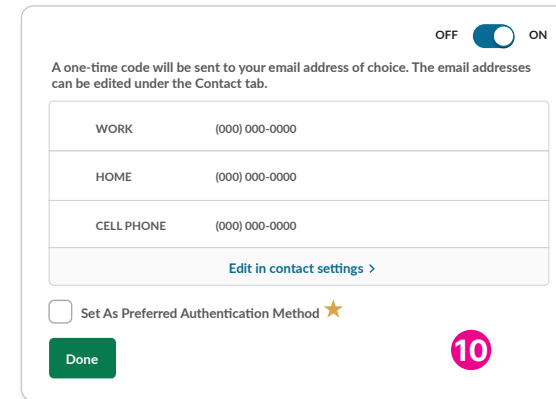

## Two-Factor Authentication

Two-factor authentication is an added layer of security you can choose to activate. When you log into online banking, you can have a code sent via voice call or text message to verify that the person accessing the account is you.

- 6 By default, two-factor authentication only happens when you log in from a new device. To use two-factor authentication on each login, regardless of device, move this switch to **ON**. Please verify your identify by text or call when prompted.
- 7 To receive a code via text message, click the pencil icon and move the switch to **ON**. (You must have a phone number associated with your account. To add one, see **Settings - Contact**.) Click **Done**.
- 8 To receive a code via voice call, click the pencil icon and move the switch to **ON**. (You must have a phone number associated with your account. To add one, see **Settings - Contact**.) Click **Done**.
- 9 Select Enroll and scan or enroll the code into your authenticator app.

- 10 If you activate more than one form of two-factor authentication, you can check the box next to **Set As Preferred Authentication Method** before you click **Done** to make that the default choice.

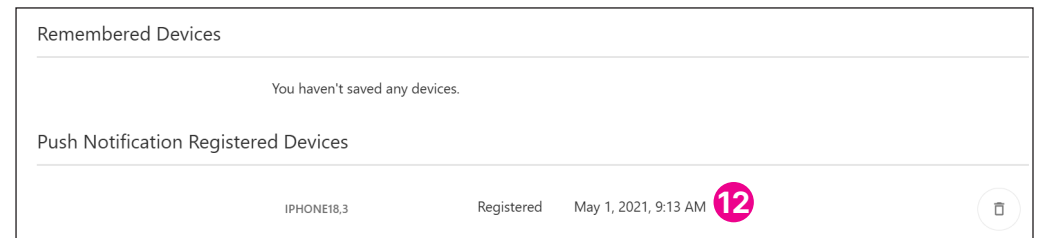

A screenshot of a contact settings dialog box. At the top right, there is a toggle switch labeled "OFF" and "ON", which is currently turned "ON". Below the toggle, a note states: "A one-time code will be sent to your email address of choice. The email addresses can be edited under the Contact tab." There are three rows, each representing a different email address type: "WORK", "HOME", and "CELL PHONE", each followed by a placeholder "(000) 000-0000". Below these rows is a link that says "Edit in contact settings >". At the bottom left, there is a checkbox labeled "Set As Preferred Authentication Method" with a star icon next to it. At the bottom center is a green button labeled "Done". At the bottom right, there is a pink circle with the number "10" inside.

## Remembered Devices

- 11 This section lists devices you have logged in from before and chosen to remember. To delete a device from this list, click on the trash can icon next to it.

## Push Notification Registered Devices

- 12 This section lists devices you have allowed push notifications on. To delete a device from this list, click on the trash can icon next to it.

A screenshot of a settings page. The top section is titled "Remembered Devices" and contains the text "You haven't saved any devices." Below this is a section titled "Push Notification Registered Devices". This section contains a single entry: "IPHONE18,3" with the status "Registered" and the date "May 1, 2021, 9:13 AM". To the right of this entry is a pink circle with the number "12" inside, and to the far right is a trash can icon.
